

No Crying in Greenrest

Tuesday, 11 August 2026 · plot and bookkeeping: what changed, what is canon, rulings, threads, quotes

The GM's record of the session, spoiler-tolerant: the companion to the player recap. Nothing here was shown to the players.

Loose threads & hooks live at the table

- **Session 4 site LOCKED: the caves (= the Hollow Shrine).** Drew: "Were we going to do the caves? I think that's where the town folk were going to..." — DM confirmed he'll prep it. Wight-themed per the plot doc; the max-HP-drain clock is the design. Prep before 2026-08-18.
- **One displacer beast ESCAPED** — fled when the alpha died, "never to be seen again" per the narration, and the wrap line said the threat is eradicated. Decide if it's truly gone (clean) or a later echo; the plot doc's Feywild-origin seed (the failed session-2 lintel site) remains unspoken and available either way.  **RESOLVED 2026-08-17 (owner): gone for good** — no echo; the wrap narration stands as literal truth. The Feywild-origin seed is unaffected (origin lore, not a survivor hook).
- **Marn's Journal + Sera's Map of the Four Ruins are in the party stash, UNREAD.** Tom said "I'll check it out this week"; DM said "read the journals next time." These are the two documents that carry the Kestrel Company's story — decide the journal's actual text before someone opens it mid-week from home. The map presumably marks all four ruins — it can formalize the shard-site menu.
- **Selma was never visited.** The party's stated plan ("she's drugging the whole town — talk to the apothecary after") was preempted by the hunt. She is now the #1 morning-after target, and they know the tonic label, the weekly cadence, Coll's childhood story, and Pip's "mommy takes my medicine." Expect a direct confrontation next session.
- **The party deliberately slept WITHOUT the tonic and got the four grief-dreams** (the night-zero dream landed exactly as planned; Jetten's moonstone necklace glowed during it — he hasn't asked about the necklace yet). Gren nat-20 Religion: dryad identified by name. Thomas publicly connected dryad ↔ the guarded gray tree.
- **Warrenholt's whisper is only half-cashed.** He gave the displacer briefing openly, but the "mistakes those adventurers made / don't want to bother Oswin" line implies more he hasn't said — he's now a standing side-channel away from the mayor's ears.

- **Pip is the party's informant** — black cats delivered (his "Selma doesn't shut up" tip is void: Selma doesn't know the Broken Heart; plot §3.2), refused gold, wants adventure. A recurring asset (and a liability the town might notice).
- **The tree guard protocol is exposed:** four guards, orders from constable + mayor, "don't let anybody chip the bark." Morgash loudly flagged it in the square. If anyone chips the bark, decide what actually happens.
- **Morgash is holding his dream close** — told the party about the woman but withheld Lae'zel. In-party information asymmetry to play with.

Bookkeeping — applied at the table (verified against live sheets post-session)

- **Purchases (Mother Wend):** Gauntlets of Ogre Power → Thomas (attuned; STR 19), Bracers of Archery → Jetten (attuned), Wand of Magic Missiles → Gren — 400 gp each. Plus: Morgash pike/greataxe/dice, Thomas 15 javelins + 6 torches, Jetten caltrops ×10 / bullseye lantern / arrows ×20. Sales: longsword, battleaxe, quiver, gem pouch (45 gp), fine cloth, wine cask.
- **Stone of Good Luck: Thomas → Gren** (Thomas un-attuned to make room for the gauntlets; Gren attuned). Both sheets verified.
- **Gren's 2 healing potions → Morgash** pre-fight; Morgash drank 3 in the fight (3 left), Thomas drank 1 (1 left), Jetten drank his (0 left), Gren has 0. **Party potion economy is nearly dry** — the 2× Greater Healing in the stash are the only reserve. Selma sells potions (Anthony asked); a restock scene is teed up.
- **Camp loot → party stash (22:46):** full manifest in recap.md. Maul of Momentum has since been moved to Morgash's sheet — **attunement required, not yet attuned** (he currently attunes nothing else, so it's a free slot — remind Anthony).
- **Kestrel Company names now in play via loot:** Sera (archer — longbow/shortsword/studded leather/map), Marn (journal/light crossbow/traveler's clothes), Brakk (claw-rent plate). Locket = the company badge. Keep these consistent with the camp lore build.
- **Gold:** 74 gp from the crate to the stash. Mid-session accounting got tangled (Loot Shelf transfer auto-converted to platinum, "there's something weird but close enough"); DM injected ~100 gp to the stash to square Gren's Wand purchase. Stash math is APPROXIMATE — if it matters later, audit against expectations, not memory.
- **Level-4 homework: 3 of 4 landed clean.** Gren (Fey-Touched, CHA 18), Morgash (GWM, STR 18), Thomas (Shield Master, STR 16 base). **Jetten's feat/ASI is STILL not on the sheet** (second session running — DEX 18 may embed a hand-typed ASI). Ask Drew directly.

- **Inspiration:** Morgash earned one for the "life is not perfect" speech; Thomas held one through the fight (offered a reroll, saved it). Verify who still has one banked.
- **Session-end state:** party narratively back in Greenrest for a safe rest, but sheets were left AT end-of-combat (Jetten 3 HP, slots spent, Bless/Bane effects lingering, all HD unspent). **Run the long rest / cleanup before or at the top of session 4** — including expiring the stale Concentration effects (Bless-Fey-Touched on Gren, Bane on Thomas, Hunter's Mark on Jetten) and the disabled Prone effects.

Rules & rulings made at the table (now precedent)

- **Advantage/disadvantage cancel = straight roll, and stays canceled** — "once something gets canceled out it stays that way; otherwise it's too confusing with stacking." (Vow of Enmity + displacement → normal roll.)
- **Nick mastery order:** the DAGGER (the Nick weapon) triggers Nick; the extra attack folds into the Attack action and **frees the bonus action** — it does NOT grant a third attack. Jetten accepted and immediately spent the freed bonus on Healing Word. This is the standing reading.
- **Bonus-action leveled spell locks the action to cantrips — INCLUDING wand activations.** DM looked it up mid-fight; Gren's same-turn Healing Word + Wand volley was let slide once as already-rolled, then enforced.
- **Administering/drinking a potion = bonus action "for now"** — flagged as "some tables say action; we'll deal with that another day." House default: bonus action.
- **Precision Attack: attack roll only, never damage** — re-taught twice tonight (Anthony, then confirmed when the DM proxied his roll). Third session it's come up; consider a card.
- **Spellfire Burst rider** confirmed in play: any ≥ 1 sorcery-point spend on the turn (Subtle Spell qualifies) → Bolstering Flames temp HP to a chosen creature. Used twice.
- **"All healing doubled" house-rule question (open since session 2): RESOLVED — there is no house rule.** Tom's "healing is doubling / so much better" table comment referred to the 2024 rules baseline (Cure Wounds 2d8, Healing Word 2d4). All tonight's heals were rolled RAW 2024. Close the session-2 flag.
- **Cover:** quarter cover through fog run as -2 to hit (attacker-side penalty, consistent with the session-2 convention).
- **Weapon mastery = no daily training bookkeeping** — "if you're wielding the weapon, use the mastery." (Said while Morgash shopped for a pike/greataxe.)

- **Lantern of Revealing in combat:** treated as a Magic action to unhood; 30-ft bright light strips displacement entirely while the beast is in the light (they disengaged to the edge and re-cloaked outside it). Matches the plot doc's "light anchors the wound" intent — now table-canon.

Fix-list (observed tech/content issues)

- **Loot Shelf gold transfer auto-converts to platinum** and confused everyone ("it turned it into platinum"); party-stash coin math drifted enough that the DM hand-injected ~100 gp. Worth a look at the currency-conversion behavior on transfer (or a "no auto-convert" flag).
- **Mage Armor self-cast friction AGAIN** (session-2 fix-list repeat): Gren cast it twice with no effect applied until walked through the card's target-arrow flow. The players-can't-apply-effects permission question is still open.
- **Combat tracker: hidden/unrevealed NPC combatants didn't show for players** mid-fight ("he didn't unhide... that's like a bug they have") — DM worked around live. Check combatplus vs. hidden-combatant reveal.
- **A dead combatant kept the combat open at the end** — token drag was blocked ("Combat is underway") until the DM intervened; also "he never properly rendered attack you" earlier. Minor, but the end-of-combat cleanup path could be smoother.
- **Morgash's second Relentless Endurance healing roll** posted twice (1 HP ×2) and a Second Wind got spent-then-refunded during the mouse outage — sheet ended correct, but the resource-refund flow is fiddly under pressure.
- **DM proxy-rolling for a player worked well** (mouse battery death) — Foundry held up; no action needed, just noting the pattern works.

Scheduling

- **Next session: Tuesday 2026-08-18, 8 PM ET** ("Next week?" — general yes). Robert flagged an early Wednesday, so the DM promised **shorter sessions** going forward ("I'll make them shorter. Sorry about going over" — tonight ran ~3h40m).
- DM prep for session 4: the caves / Hollow Shrine (wights, max-HP clock), Selma-confrontation branch, Marn's Journal text + Sera's map contents, long-rest cleanup at session top.
